

Use of Optix™ Multi-Focus Technology
assures high efficiency and outstanding performance

Dual Elliptical Reflector
provides highly controlled light distribution

Miro® Reflector by Alanod
provides 95% reflectance and high specularity

Available with T5 and T5-HO lamps
delivers high-level illumination and maximizes energy savings

Choice of light distribution patterns
allows flexibility to optimize fixture for specific application

White Baffle
provides longitudinal shielding

Electronic ballast
ensures high operating efficiency and energy savings, and low noise

Knock-outs provided at end caps (not shown)
enables row mounting

Easy to install grid clips (not shown)
provides effortless mounting in grid ceilings

3-1/2" aperture
minimizes intrusion on ceiling design
